

What is Being Done?

The Michigan Department of Transportation (MDOT) will rebuild portions of the Capitol Loop in downtown Lansing in 2004 and 2005. The Capitol Loop consists of several major streets near the State Capitol building and surrounding the State Office complex.

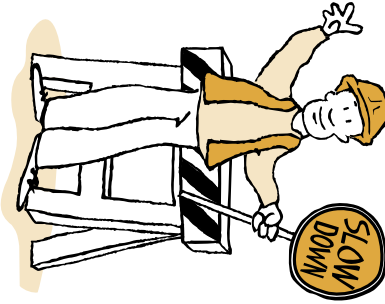

As part of the project, MDOT will be reconstructing portions of Allegan, Ottawa, Pine and Walnut Sts., along with Capitol Ave. The work will take place concurrently with the City of Lansing's work to eliminate the combined sewer system in this area.

Also included with this project are aesthetic improvements including landscaping, decorative sidewalks and street lights that will create a distinctive appeal to this portion of downtown Lansing. Streetscape enhancement work will also take place on Cedar and Larch Sts. from south of I-496 to Michigan Ave.

Revised Capitol Loop Reconstruction

Project Staging

Due to the volume and complexity of the work, construction will take two years to complete. Work will take place in stages to reduce the inconvenience to motorists and to maintain access to the downtown area. In addition, pedestrian access will be maintained throughout the project.

2004

Road reconstruction and sewer work on:

- Ottawa St. between Capitol Ave. and MLK Jr. Blvd.
- Pine St. and Capitol Ave. between Ottawa and Allegan Sts.

During construction, all streets will be closed to thru traffic to accommodate repairs with local access maintained.

The exceptions will be Capitol Ave. where one lane will be maintained at all times. Work on Capitol Ave. will not begin until May 2004 and will be completed by early July.

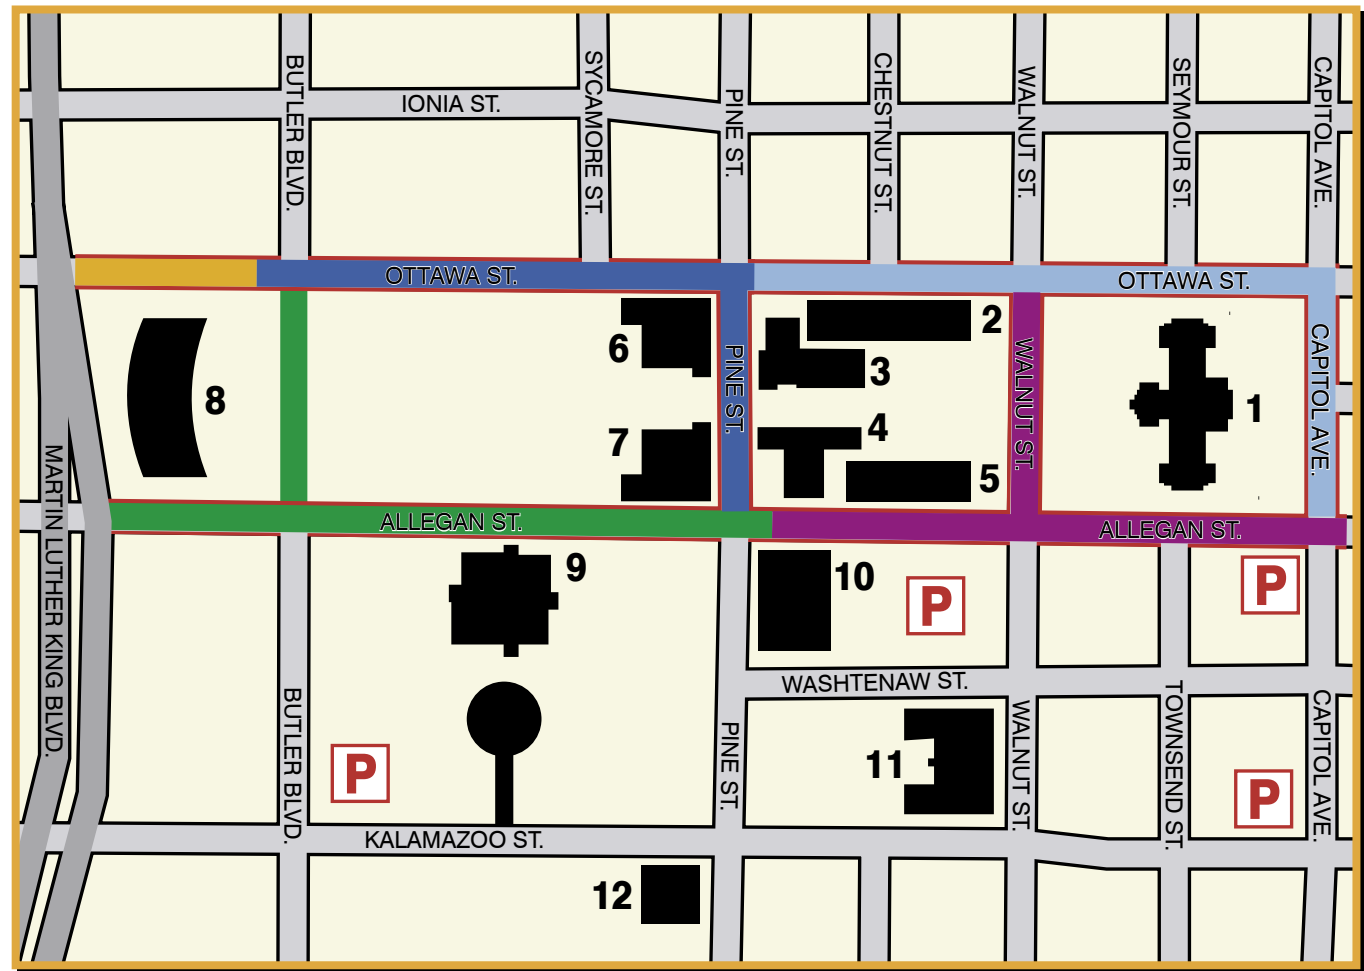

Ottawa St., from Capitol Ave. to Walnut St. will reopen to traffic by early August.

2005

Road reconstruction and sewer work on:

- Allegan St. between Capitol Ave. and MLK Jr. Blvd.
- Walnut St. between Ottawa and Allegan Sts.

During construction, all streets will be closed to thru traffic to accommodate repairs. Local access will be maintained.
